- Welcome page contains verification codes for REGISTER NOW and FORGOT PASSWORD
- Password are now editable if you've passed the verification code for FORGOT PASSWORD
- Unverified users of the POS system can't proceed to the other forms.

v.0.1.3

- Major improvements on Registration Form made by CodeHutPH
- Adds employee number automation on REGISTRATION FORM
- Employee's ID are unique and can't be repeated
- Employees can now upload their profile pictures

v.0.1.4

- STOCK FORM CRUD functionality added by CodeHutPH
- Encryption and data protection measures implemented to protect customer data and payment information.
- System now compliant with relevant security standards and regulations.

v.0.1.5

- MAIN FORM added by CodeHutPH
- Basic design implemented on Main Form
- New design suggested by the testers for the exit button.

v.0.1.6

- Major improvements on WELCOME/LOGIN page by CodeHutPH.
- Implemented Mr. Israel Cabasug's requirements on LOGIN page.
- Implemented user-admin privilege effectivity.
- Fixed minor bugs on the system.

v.0.1.7

- CASHIER Form added by CodeHutPH.
- Implemented Mr. Israel Cabasug's requirements for CASHIER form.
- Implemented critical feature on TRANSACTION table.
- Fixed minor bugs on the system especially on STOCKS form since they are heavily interrelated.

v.0.1.8

- REPORTS Form added by CodeHutPH.
- Added LOGIN/LOGOUT TIME feature.
- Implemented using CRYSTAL REPORTS and MS EXCEL.
- The system can now both produce SOFTCOPY AND HARDCOPY data to be used for data analytics.

v.0.1.9

- Major improvements on MAIN page by CodeHutPH.
- New version of UI/UX implemented on MAIN Page.
- Added HR MANAGER administrator for more secured employee registration.
- Main Page shows uniqueness of system and ownership control for each user's rightful privilege.

v.1.0.0

- Major system optimization performed by CodeHutPH
- Usage of SHORT CODES and NEW ALGORITHMS implemented by CodeHutPH for backend optimization purposes.
- Usage of COMMENTS heavily implemented by CodeHutPH for system's future-proofing, scalability level, and easy access for collaboration.
- Additional SHORTCUT KEYS implemented on each and every form for a better USER-EXPERIENCE.
- System has now reached its 1st official version ready for release to the public with full functionality.
